

M. Huzaifa Habib Shah

MERN Stack Developer • Full Stack Engineer • Rawalpindi, Pakistan

mhuzafahabibshah@gmail.com | +92 318 6088483 | github.com/m-huzaifashah | linkedin.com/in/m-huzaifa-habib-shah

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience across 2 internships and 4 full-stack projects, including an AI-enhanced alumni portal built as a final-year project. Proficient in RESTful API design, MongoDB schema modeling, React component architecture, JWT authentication, and role-based access control (RBAC). Experienced integrating AI/ML services via FastAPI microservices and third-party LLM APIs (OpenAI, Gemini). Currently building expertise in RAG pipelines, LangChain orchestration, Redis caching, and PostgreSQL-backed systems. Available for full-time and remote roles.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript
Frontend:	React.js, React Hooks, Vite, Tailwind CSS, SCSS, Axios, Responsive Design, Component Architecture
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication, bcrypt, Middleware
Databases:	MongoDB, Mongoose, PostgreSQL (<i>learning</i>), Redis (<i>learning</i>), Schema Design, CRUD Operations
AI / ML:	OpenAI API, Google Gemini API, LangChain (<i>learning</i>), RAG Pipelines (<i>learning</i>)
Tools:	Git, GitHub, Postman, npm, Vercel, Railway, dotenv

PROJECTS

AI-Enhanced Alumni Portal | *TypeScript · React · Node.js · Express · MongoDB · Python · FastAPI · SBERT · XGBoost · JWT*

- Built a full-stack alumni management platform with RBAC supporting 3 user roles (Student, Alumni, Admin) handling job postings, event management, and profile management with JWT-protected routes.
- Engineered two AI modules: a Skill Gap Analyzer that maps student skills against industry job descriptions, and a Resume ATS Scorer that parses CVs and returns ranked improvement suggestions using SBERT embeddings and XGBoost classification.
- Served the ML pipeline as a FastAPI microservice integrated with the main MERN backend; designed MongoDB schemas with relational referencing across users, skills, and job data.

AI Interview Preparation Platform | *React · Vite · Node.js · Express · MongoDB · Google Gemini API · JavaScript*

- Built a full-stack AI-powered mock interview platform with a React + Vite frontend and Node.js/Express REST API backend connected to MongoDB.
- Integrated Google Gemini API through a dedicated service layer to dynamically generate role-specific interview questions and deliver intelligent, context-aware feedback.
- Structured backend with clean separation of routes, services, and config modules; built responsive component-based UI using SCSS.

Backend Ledger API | *Node.js · Express · MongoDB · JWT · Idempotency Keys · Clean Architecture*

- Engineered a production grade double entry financial ledger REST API with idempotency keys ensuring every transaction is processed exactly once regardless of retries or network failures.

- Implemented stateless JWT authentication with bcrypt password hashing; protected all financial routes with role-aware middleware authorization.
- Structured codebase using clean architecture layers (routes, controllers, services, middleware) with environment-based configuration using dotenv.

Mini Spotify Backend | *Node.js · Express · MongoDB · JWT · RBAC*

- Built a music streaming backend with RBAC artists get upload and streaming endpoints, listeners get playback-only access, with all routes protected by JWT middleware.
- Handled user management, audio file uploads, and streaming endpoints with clean separation between authentication, authorization, and business logic layers.

EXPERIENCE

MERN Stack Developer Intern — **CodeAlpha** 2025

- Developed full-stack features using React.js and Node.js/Express.js, ensuring cross-browser compatibility across deliverables.
- Built and tested RESTful APIs with JWT authentication and bcrypt password hashing; modeled MongoDB schemas and implemented CRUD operations using Mongoose.
- Applied modular architecture patterns across the codebase, improving maintainability and separation of concerns.

Frontend Developer Intern — **DevelopersHub Corporation** 2025

- Built and shipped responsive React.js pages with reusable component patterns and consistent cross-device UI.
- Integrated multiple REST APIs using Axios; managed asynchronous state with useState and useEffect hooks.
- Improved component reusability across the codebase, reducing duplication of UI logic.

EDUCATION

BS Computer Science — **Riphah International University** 2022 – 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Networks, Web Development
